

S.S.S. MAKES A LASTING CURE

Not only its proven ability to cure, but its absolute safety as a remedy, has made S.S.S. the most extensively used of all medicines in the treatment of Contagious Blood Poison. Unlike the strong mineral mixtures, which temporarily remove the outward symptoms and shut the disease up in the system, to carry on its destructive work on the delicate and vital organs, S.S.S. strikes directly at the root, and by purifying the blood of every trace of the virus, completely and permanently cures the trouble. S.S.S. is Nature's blood purifier, harmless in its action and certain in its good results. It is made from a combination of roots and herbs, each of which has a definite and specific action in purifying the blood. Years were spent in selecting and proportioning the different ingredients, but when S.S.S. was perfected it soon demonstrated its superiority over all other blood medicines, and now, after 40 years, it is still the one and only certain cure for Contagious Blood Poison. While driving out the poison from the circulation S.S.S. builds up and strengthens the system by its fine vegetable tonic effects. If you are suffering with Contagious Blood Poison S.S.S. is your most certain reliance, and because of its freedom from mercury, potash or any other mineral, it is absolutely safe for every one. A Storehouse of Wealth Is a Home of Health

It often happens that your wife is over-worked and you don't know it until she commences to complain of lost appetite, lame back, etc., and at last gives up and the Doctor is called, and then you rush out to secure help for the same work she did. At last, after a rest, she recovers, and you take a personal pride that you did your part in having her health restored, but you overlooked the day in and day out never-ending toil of preparing the meals over the hot coal stove and over-heated kitchen.

The nerve racking tension and patience required to carry on this domestic home service is rarely comprehended and seldom realized by his Royal Highness. If husbands had to do the cooking for thirty days, we could not begin to supply the demand for gas stoves. Why not figure that your wife's health is all in all to her and you, one year's rest cooking with gas will restore her former youth and beauty. If you try it, this is no fairy story.

SALT LAKE AND STATE NEWS

VETERAN DRIVES FROM OKLAHOMA.

Salt Lake City, July 27.—Carrying his seventy years as erect as he did when he shouldered his musket in '62, J. W. De Hass stood proudly by his wagon in Pierpont street this morning and pointed to it as the vehicle which had carried him, his wife and his son all the way from Oklahoma City to this city that he might attend the forty-third encampment of the Grand Army of the Republic. It was a journey of some three thousand miles in all kinds of weather from April until August.

Corporal De Hass, accompanied by Mrs. De Hass and their youngest son, arrived here this morning in their wagon, entering the city after a ride last night through Parley's canyon. All members of the little party are well and the veteran of '62 with a smile, told a News reporter this morning of their trip to this city. "We started from Oklahoma City April 15 and arrived in this valley this morning. The horses are a bit peaked, but aside from that we and our animals are well and happy. We have had a mighty hard trip, for at the start the roads were made roads bad, fording streams almost impossible, and delayed us just at the time we hoped to make our best speed. We made camp all along the way, carried our own kitchen and everything else we needed except food. We bought our food as we went along, and since I haven't forgotten how to catch fish we had as much as we wanted all the way. The last fishing I did, by the way, was in Weber canyon, and, by hooky, it was a trout seventeen inches long that dangled from the end of my line. Our first stop at a big town was in Denver, and from there we made Laramie, in Wyoming, then Saratoga, and then back into Colorado at Dixon. From Dixon we doubled back into Wyoming to Wamsutter, on the Union Pacific. We followed the Union Pacific to Rock Springs and then to Green River, hitting through Echo canyon and over to Coalville and Park City. From there we went down the canyon and came out this morning and drove into the city."

LEAVES WITH EXPERT DRIVER.

Salt Lake City, July 27.—George Danley left for Evanston on the noon train today, taking with him a professional driver, who will endeavor to recover the body of Ellsworth Spencer of the city, who was drowned in Bear river Saturday. At Evanston the party will be met by an automobile and driven to Wimmer's ranch, thirty-five miles distant.

The drowning of Spencer came as a tragic ending to his vacation, which he was spending at the ranch. The boy is 18 years of age and the son of Mr. and Mrs. A. J. Spencer, 909 First avenue. With several companions, who were members of the vacation party, he was swimming in a favorite hole at the time of his death. Without a cry he went under the water, and for several minutes it is presumed, was under water before his absence was noted. The boys were diving and swimming about, and in their interest in the pastime, the tragedy was not observed until it was too late to lend aid to the victim, who it is now believed, was suddenly seized with cramps.

The Bear river is noted for its underrunners and eddies, and although a search was kept up for some time the boy was not discovered last night when Mr. Danley left for this city to secure the services of an expert driver.

LEHI'S WATER SUPPLY BEING DEVELOPED

Lehi, July 27.—Engineer R. R. Lyman, in company with Mayor Velt and the city council, made a visit to Schoolhouse Springs, north of Alpine Friday last, and were agreeably surprised with the amount of water that had been secured there by the development work that has been going on. Six of the largest springs are being brought together for the Lehi water supply. The trench to Alpine from the springs has already been dug and the pipe will be laid right away. Work will start soon to dig a trench for the line from Alpine to Lehi. However, the trench will not be dug across farms that have growing crops until they are removed. The settling tank along Lehi has been determined upon and will be 50x50 feet by 14 feet deep. Bids are being solicited for this cement-covered tank.

Today the taxpayers are voting for a city bond issue of \$20,500, \$13,000 to cover the present indebtedness of the city and \$7,500 to apply on waterworks. There is no question but that the bonding will be voted yes by a large majority.

AN ERA OF PROSPERITY OPENING FOR EMERY CO.

Huntington, Emery Co., July 27.—The outlook for prosperity for Castle valley seems to be looming up in big chunks. What with the development of large coal properties, building of railroads and large irrigation enterprises, Emery county is starting on an era of development that will bring it to the front ranks of the counties of Utah, and there are yet 300,000 to 400,000 acres of the best coal lands in the United States in the hands of the government for sale to those who are well enough off to purchase them. The crops are in good condition, and an abundant harvest is expected.

PROVO CITY COUNCIL HOLDS A BUSY SESSION

Provo, July 27.—The committee on judiciary at the meeting of the city council last evening, reported adversely on the amendment proposed by City Attorney Thomas at Friday evening's meeting to the depot franchise ordinance. The report was adopted. The committee on fire department recommended the appropriation of \$45 to enable the fire department to take the band with them on the excursion to the firemen's outing at Lagoon on August 4. The money was appropriated.

The committee on streets and alleys recommended that the street trolley be rented to the Provo-Olmsted boulevard committee at \$5 a day; this includes compensation of engineer. Report was adopted.

A large number of citizens petitioned to have the music of the merry-go-round which is being operated on the city square, suppressed. The committee on public grounds and city prop-

erty was instructed not to rent the ground to merry-go-rounds after the contract with the present proprietor is expired.

NEW INCORPORATIONS.

Salt Lake City, July 27.—The Grasselli Chemical company of Park City filed articles of incorporation this morning with the secretary of state. It has a capital stock of \$10,000, divided into shares at \$100 each. The officers are: Daniel A. Grasselli, president; Daniel A. Bailey, vice president; Eugene R. Bailey, secretary; and Eugene B. Grasselli, treasurer.

The Beaver Co-operative Creamery company of Beaver filed its articles of incorporation this morning with the secretary of state. The capital stock amounts to \$2,000, divided into shares of \$10 each. Charles T. Harris, T. W. Merrill, W. S. Fulton, J. S. Gillespie, Sam W. White, Jr., and the incorporators and will act as directors of the company until the officers are elected.

Articles of incorporation of the Pine Creek Irrigation company of Escalante, Garfield county, were filed this morning with the secretary of state. The capital stock amounts to \$5,000. J. C. Law is president, J. S. Barney, vice president, and A. V. Griffin, secretary and treasurer.

The Great American Life Insurance company of St. Louis filed a copy of its articles of incorporation in the secretary of state's office this morning. James B. Madison of Salt Lake is named as the resident agent, who will write insurance for the company.

W. W. WOODRING LOSES FINE TROTTER HORSE

Salt Lake City, July 27.—W. W. Woodring, prize, the horse Oveta, died yesterday as a result of an illness which befel the fine mare several days ago. The great animal was one of the best trotters in the intermountain country, and had been familiar on Utah tracks for the past few years. She had a mark of 2:12.4 and was looked upon as being able to lower this mark during the coming state fair.

Oveta had been under training for some time and entered in the free-for-all race at Wandemere on Saturday. She was a popular favorite with the crowd when the race started, but it was seen in the first heat that she was not trotting up to her training.

She finished second to Arizona in this heat in 2:18, but came back stronger in the second heat, and although beaten, made a head to head race of it to the wire. This was her last effort and although the mare finished the race, she was not in the running at all.

It was given out at the time that the animal was not well and after the race an examination showed the horse was far from being right. She was at once put under a veterinarian's care, but grew worse that night and the next day, dying Sunday night.

Woodring had refused \$1,500 for the animal. Oveta was always a popular starter in all the races and had many followers in the pool boxes whenever she started.

QUARANTINE IS ORDERED BECAUSE OF GLANDERS

Salt Lake City, July 27.—Horses in Emery and Carbon counties are afflicted with glanders, according to Dr. Young, state veterinarian, and he has accordingly ordered a quarantine, which will prevent the shipment from those counties until they can pass the Mallen test.

Dr. Young has inspected a number of animals in those two counties and found that the horses were afflicted with glanders. Efforts to stop the shipment of diseased horses from there by ordinary methods did not accomplish results, hence drastic remedies must be applied and the quarantine results.

Dr. Young is determined to stamp out disease among animals in the state. He is in charge of the bureau of animal industry of the department of agriculture for a number of years and is a graduate in veterinary surgery. The act of the legislature creating his office gives him ample power to enforce a rigid quarantine whenever necessary and this he proposes to do.

TWENTY-FIVE EXTRA POLICE FOR G. A. R. WEEK.

Salt Lake City, July 27.—Chief of Police S. M. Barlow today took prompt advantage of the authority granted him by the city council last night to add twenty-five special officers to the force for the period of four weeks, and that number of applicants for the positions will report at headquarters this afternoon at 5 o'clock for the purpose of being sworn in. The majority of them will begin active duty tonight, and the remainder tomorrow morning.

The following are the chief's selection from a list of applicants numbering pretty close to the 100 mark: C. C. Riley, Peter Anderly, John E. Egbert, Raradick A. Polson, H. C. Butler, Frank Riley, William Edwards, E. G. Randolph, John Walsh, Samuel Allen, H. B. Clark, John McNamee, A. A. Middleton, Charles L. White, W. L. Goodsell, Herman Bauer, Al Ecklund, E. J. La Plante, Walter Ryan, Amos Morton, Frank Keane, H. F. Murray.

Most of these men will be assigned

to the afternoon and night patrols and a number will be used to increase the staff of plain clothes men during the encampment. During the period of the encampment the force will be further increased by fifty special men.

to the afternoon and night patrols and a number will be used to increase the staff of plain clothes men during the encampment. During the period of the encampment the force will be further increased by fifty special men.

FINE FISHING ON WEBER RIVER

Salt Lake City, July 27.—A party of Salt Lake fishermen returned today from a fishing trip to the Weber, locating their camp not far from Peoa, and report being fishing there than at any other place within a reasonable distance from this city. The party consisted of Mr. and Mrs. Emil (Fat) Schuler, Mr. and Mrs. John Foote and Earl Morgan, the singer.

They spent nearly two weeks on the Weber not far from Peoa and near the mouth of the canyon and the fishers averaged about sixty pounds a day, the trout ranging from one-half to 1-2 pounds.

"To give you an idea of the fishing we had," said "Fat" Schuler today, "I only need say that heretofore I could not catch a fish in a restaurant show-case with a couple of nets, but up there it was nothing to land twenty or thirty in a few hours' angling. The best fishing was at about high noon, and while we found the big fellows somewhat lazy, the smaller ones jumped readily to the fly and we got all we wanted—and then some. Morgan was the star Isaac Walton of the bunch, and it was nothing for him to land forty to fifty a day, and just before we felt he hooked a beauty—41-2 pounds, no 'kid' with a spinner."

Schuler stated that he was going to have a talk with State Fish and Game Warden Chambers and report to him some conditions that should be attended to. He says that the stream is being dynamited and thousands of trout destroyed and also that some of the farmers who dam the stream to run water on their crops, failed to comply with the law, with reference to greens and as a result thousands of fine fish are run into the fields and perish.

REPORTS RECEIVED BY COMMISSION

State Conservation People Held Second Meeting Since Their Appointment.

Salt Lake City, July 28.—Members of the state observation commission, who were appointed recently by Governor William Spry, held their second meeting Tuesday afternoon at the office of the governor and received reports which had been submitted by the heads of several state departments, containing data which is desired by the commission.

The commission has been informed that all the state officials will give their co-operation in the preparation of the report which is to be sent by the commission to the National Conservation congress, at its meeting at Seattle, on August 26, 27 and 28. The report will contain general information in regard to the natural resources of the state, statistics being furnished by the heads of the government weather, reclamation and forestry departments as well as the state departments.

WATER COMPANY RIGHTS OF WAY ARE ATTACKED

United States Brings Suit to Annul Rights.

Salt Lake City, July 28.—The United States of America, through Hiram E. Booth, United States district attorney, filed an equity suit yesterday in the Federal court to annul certain rights of way held by the Wasatch Water company in Wasatch county. The right was granted in 1892 under the act of March 3, 1891, and allowed the water company to build ditches, canals and reservoirs through a number of sections in Wasatch county. In the bill the government alleges that the company took no steps whatever to use or protect its rights. The annulment is asked on the statute which provides a five-year period in which to complete the work set forth at the time the grant was made. The costs of suit are also asked.

PLEASED WITH GREAT STRAWBERRY PROJECT

L. S. Hill, Superintendent United States Reclamation Service.

Provo, July 27.—L. S. Hill, superintendent of the United States Reclamation service for the Southern district, is in this city after making an inspection of the Strawberry valley project. Mr. Hill expressed himself as being pleased with the wonderful progress of the work. He will not be surprised, he says, if, when the electric power is installed for the tunnel driving work, the United States record for number of feet driven in a month is broken.

Mr. Hill will be the guest tomorrow of J. C. Lytle, engineer in charge of the Strawberry project, on a boating trip over Utah lake. At that time his attention will be called to the wonderful possibility of making the lake one of the greatest reservoirs in the world.

MINING NEWS

INTERNATIONAL COMPANY HAS FIVE HUNDRED EMPLOYED.

Salt Lake City, July 27.—A large force of men is being employed in the construction work by the International Tunnel and Reclaiming company. The payroll at the general offices in this city shows that they have between 400 and 500 men at the smelter site near Toeoe on the railroad work and at the new station and warehouse that is being built in the new portion of the town.

While the railroad has been completed to the smelter the line is being resurfaced now that it has had time to settle, and when this work is completed there will be some switches put in at the works. The construction on the plant is being rushed with all possible speed and all the men and teams that can be used to advantage are being employed to place the material in place just as fast as it arrives. The warehouse and depot will be of advantage to the company and will be an ornament to the city as well as a great convenience to the men and their families traveling back and forth from the camp to this city.

Not only is this company paying out large sums of money to the working people of this state, but it is among the people who spend their money at home. The white laborers are the only ones who can secure employment with the international, and just so long as the men are sober and industrious they are assured regular work.

The international is on the high road to breaking all previous records in the matter of construction work. When it was first announced that they

Everyone Transacting A Business
and everyone who receives and pays out any considerable amount of money, should have a checking account. Paying by check has many advantages over paying in currency—among which are security, convenience, saving of time and expense.

We cordially invite your account, subject to check.

We will pay you 4 per cent interest on the money you deposit in our Savings Department and compound the interest quarterly.

OGDEN STATE BANK

would have this work completed in time to accept the ores from the Utah Consolidated mine in April of next year some smelter men took the position that it would be impossible to complete such a plant as designed within so short a time. Now it appears that they have not only got the work along so far that its completion on schedule time is assured, but the prospects are that construction may be completed by the first of the year. Even the smelter people claim that they will be in a position to receive ores by January 1, 1910, though they admit that they may have some portions of the plant to finish up after this date.

The outlook at this time is very favorable for the International company to enlarge its original plans for furnaces with an initial capacity of 2,000 tons of ore daily. It is understood that a number of ore producers are planning on entering into contracts with the new smelter concern just as soon as they can complete the arrangements with the older custom plants now operating.

TALKS OF WESTERN UTAH.

Salt Lake City, July 27.—According to a Boston man who has just returned from a visit to the property of the Western Utah Copper company there is much wealth to be taken out of the Gold Hill property. The man is quoted as follows in the Boston Financial News.

"The mine looks splendid. We were in with the crosscut twenty-five feet when I left and had not determined the width of the ore. The new ore is a part of the ore that we have been developing, separately only by a thin slab of time. The vein may be called a quartzite. It is a vein quartz. The ore at this point replaces it, excepting a little on the footwalls. This quartz outcrops on our property for a distance of about 4,500 feet, and disappears entirely both north and south a short distance beyond the limits of our ground. This vein is entirely separated from our copper vein which lies west of the porphyry dyke and the lead vein east of the dyke.

"Our work is developing the conditions so systematically that there should be few mistakes made in the future. Also, we will be able to block out ore very fast from now on. We will not reach the vein on the 600 level for at least forty feet yet, or in other words, I believe it is forty feet farther east than we calculated originally."

"We will not attempt any developing on the copper vein for the present, but later, I am quite sure, we can add to the ore in this vein. The Gold Hill is a great big mine that will make a lot of money. The lead vein will make dollars where the copper will make quarters. In all my experience I have never felt as well satisfied with a mine for the work done and the money spent."

GOOD GRADE ORE IS FOUND IN UNCLE SAM.

Salt Lake City, July 27.—Late arrivals from the Tintic district report an important find in the Uncle Sam Consolidated mine. This discovery was made on the first level below what is known as the tunnel workings and is of the same first class shipping character that is being extracted from the property at this time.

In drifting to the west a few days ago, it is reported, Superintendent Griggs' forces ran into an ore shoot which has since opened into a full breast of the drift. The presumption is that it is entirely a new vein, and that the company now has two distinct ore bodies from which to draw. The extent of either vein is still a matter to be determined by more extensive development.

The new ore channel is very strong and gives every indication of being permanent. Opening up so strongly near the surface, the vein gives the impression that it doubtless extends towards the surface and may be proven up to a considerable depth. As the ore is said to be a good commercial grade it should be a matter of only a short time until the Uncle Sam company can increase its output. This will doubtless make into dividends very fast, as the directors are now preparing to re-enter the dividend division about the first of next month.

A Hurry-up Medicine.
An effective remedy to be used when something must be done right away, is Perry Davis' Painkiller for sprains and bruises, for strained muscles and for the aches and pains resulting from blows and falls. Burns and cuts are instantly relieved by it and helped to healing. There is but one Painkiller, Perry Davis'. Buy the new 35c size.
